

Western Counties Society of Osteopaths

Kelvyn Evans BSc(Hons)Podiatry McPod :

Kelvyn graduated from Northampton School of Podiatry in 2000 and has gained experience in the NHS as a specialist podiatrist in diabetes, private practice and specialist interest in ingrowing toe nails, nail surgery, the high risk & diabetic foot complications. He is HPC registered & has completed a three year degree course in the specialism of podiatry. He practices from the Tarka Clinic in Barnstaple.

Dr Duncan Miller MBChB FRCA PGDipQI :

Duncan is a Consultant Anaesthetist, Preoperative Assessment Consultant and the Clinical Lead for the Sheffield Microsystem Coaching Academy at Sheffield Teaching Hospitals NHS Foundation Trust, UK.

He specialises in preoperative medicine, general anaesthesia for major urology, general surgery and orthopaedics and provides on call consultant anaesthetic cover for the major trauma centre in South Yorkshire.

He is a former quality improvement and leadership fellow at Sheffield Teaching Hospitals in 2014 and has continued coaching, teaching and lecturing since. Duncan Miller is an experienced coach of microsystems and has worked in adult and paediatric clinical teams to deliver high value healthcare.

He will talk about the common processes patients may experience before major surgery and more specifically orthopaedic pathways across the country. Specifically he will talk about upper limb and lower limb surgery, including preoperative optimisation, common anaesthetic techniques and common misconceptions.

Dave Tatton. D.O

David has a busy clinic in West London working with two other Osteopaths and a specialised Pilates Studio for rehabilitation classes.

Having trained at the BSO (now UCO) then going onto teach Osteopathic Technique and co-heading up the department with the late Adrian Barnes, also working as a clinic tutor for many enjoyable years. David frequently lectures to European postgraduate groups throughout the year enabling them to further their techniques and knowledge.

David has a great interest in adapting structural Osteopathic technique for individual patients with differing morphologies and enabling Osteopaths to apply their own techniques in specific patient situations.
